Gamba grass weed advisory committee meeting #18

A summary of activities tabled at meeting 18, undertaken in the period 7th November 2024 to 11th March 2025 to progress implementation of the Weed Management Plan Gamba Grass 2020 – 2030. Activites are those undertaken by the Gamba Grass Weed Advisory Committee members, the Weed Management Branch and the Gamba Fire Mitigation Unit.

Time 9:00am – 3:30pm

Date: Wednesday, 12 March 2025

Susanne Casanova	Chair – Representing Territory Natural Resource Management	SC
Louise Kean	Representing the Department of Tourism and Hospitality (DTH), (Parks and Wildlife)	LK
Dr David Liddle	Representing Environment Centre Northern Territory (ECNT) / Gamba Grass Roots	DL
Sharon Hillen	Representing the Local Government Association of the NT	SH
Kerri O'Brien	Representing the Department of Lands, Planning and Environment (DLPE), (Vacant Crown Land)	KB
Tom Price	Representing the Northern Land Council (NLC)	TP
Dr Natalie Rossiter-Rachor	Representing Charles Darwin University (CDU) / National Environmental Science Program	NR-R

Gamba Grass Weed Advisory Committee apologies		
Natasha Clayton	Representing the Northern Territory Cattlemen's Association	NC
Vacant position	Representing the Northern Territory tourism industry	-

Other attendees present:		
Emma Burcher	Weeds Planning Officer – Weed Management Branch (WMB), DLPE	EB
Norman Greenfield	Chief District Ranger, Litchfield Operational Manager, Parks and Wildlife – DTH	NG
Roni Opden	Manager Planning and Science, WMB	RO
Anna Pickworth	ILSC member to be appointed as new Indigenous Carbon Industry Network (ICIN) Representative	AP
Sean Spicer	Gamba Grass Coordinator, Kakadu National Park, Parks Australia	SS
Liesl Wilson	A/Director, WMB, DLPE	LW

#To demonstrate progress against the <u>Weed Management Plan for Gamba Grass 2020 – 2030</u>, the objectives of the 2020 – 2030 gamba plan being implemented have been noted beside each outcome listed below.

Summary of key outcomes against the Weed Management Plan for Gamba Grass 2020 – 2030: (committee member updates)

Objective of plan	Key outcomes this quarter
2a, 2c, 2d, 2e, 2f and 2g	 Parks and Wildlife - Department of Tourism and Hospitality <u>Darwin Urban Parks:</u> Cobourg - ongoing surveillance, no new detections or current known infestations.

Department of LANDS, PLANNING AND ENVIRONMENT

Gamba grass weed advisory committee meeting #18: Meeting summary

	• Berry Springs – Work adjacent to Lake Bennett and around Manton Dam Recreation Area.
	Some work in Berry Springs Nature Park, however access issues due to boggy conditions.
	Access issues for Blackmore River Conservation Reserve due to boggy conditions.
	Howard Springs are on top of their gamba grass program and rangers undertaking work in
	Howard Springs National Park and around Shoal Bay and Tree Point.
	Casuarina Team – Contractors working on gamba grass through the Strategic Pest
	Management Program in Charles Darwin National Park (CDNP), Casuarina Coastal Reserve
	(CCR) and Holmes Jungle National Park (HJNP). Gamba Army also working in CDNP. Gamba
	Army attempted work in Buffalo Creek Management Area however too wet, and access
	issues. Rangers have undertaken spraying in CDNP and Knuckey Lagoons Conservation
	Reserve. Wet season burns implemented in gamba grass infestation north of Buffalo Creek
	Road for follow up herbicide application.
	 Mary River National Park: 246 litres of glyphosate concentrate used (19,680 Litres of chemical) and 260 hours of staff
	time. Majority of efforts were along the Arnhem Hwy and Leichardt Point in the North
	Wildman Block along with sporadic plants along Pt Stuart roadside. The team had excellent
	access and able to spray growing flush plants. Objective was to clean up previously
	managed areas and buffer zones with repeated visits.
	Adelaide River Parks:
	Gamba grass treated at Fogg Dam/Lambells/ Black Jungle, Harrison Dam and Window on
	the Wetlands (WoW). Contractors and Rangers treated WoW.
	Litchfield National Park:
	• Program is halfway through its season with another 2 months of activities to be completed.
	Another 3 rounds of ground contract spraying, 2 rounds of aerial spraying and a follow up
	aerial re-survey at the end of the season to be completed before commencing fire
	operations.
	• Acacia Land Management - There have been 3 revisits through the Eradication
	Zones 1- 5 with Acacia Land Management so far this year focussing on treating/
	control of the regrowth in these areas as identified from the CDU aerial survey last
	year. These areas have been backed up with helicopter operations with the bigger
	infestations and isolated areas where Acacia Land Management have not been able
	to access with Land cruiser and or side by side ATVs.
	• Weed Walkers - Have been treating the more isolated areas on foot with backpack
	spraying. This has been followed up by helicopter operations where infestations have been too large to treat.
	 Parks Staff - Have been treating all the visitor node sites, walking tracks, roadsides,
	firebreaks and campground areas including Sandy and Surprise Creek campgrounds
	on the floodplains.
	• Gamba Army - will commence field control operations to establish and or widen
	buffer zones around the intensive use zones of Florence/ Buley areas and then
	work towards the Central Valley areas.
	\circ General observation – lack of significant rainfall has enabled access to sites to treat
	gamba grass, i.e. sites have not been hampered by localised flooding events
	experienced in previous years. Control activities will continue as access allows.
	Katherine Region:
	Nitmiluk is undertaking gamba grass survey of Nitmiluk and surrounding areas of Jawoyn
	land mid-March to April. This will include survey of gamba grass spread from the north-west
	around Pine Creek and seeing how far south-east it has travelled.
2a, 2c, 2d,	Victoria River District (VRD) – no gamba grass sighted. Vacant Crown Land (VCL) Weed Management Program – Darwin Region
2e and 2f	• The first treatment of weed control has been completed across VCL in the Darwin,
	Batchelor and Adelaide River areas. This program encompasses 143 clusters which covers
	200+ parcels of land. Of these 200 plus sites, 5 parcels have had limited treatment or
	reduced scope due to changed tenure / new development (Holtze and Strauss Water
	Treatment Plant).
	• The current 36-month Weed Management Program (WMP) is due to expire June 2025,
	with Crown Land Estate (CLE) Officers currently rescoping a new 60-month WMP to be
	procured, advertised and awarded before the next season (October 2025).
	CLE Officers have been liaising with Department of Logistics and Infrastructure (DLI),
	Department of Mining and Energy (DME), and the WMB to minimise duplication of weed

1a, 1b, 1c, 2a, 2c, 2d, 2e, 2f and 2g	 control where appropriate. It has been agreed that where there is no defined boundary between a road corridor and VCL (i.e. a firebreak) the 15-meter buffer from the transport weed program will suffice. This will allow program funds to be directed to other VCL priority areas. The DME have provided information of which titles over VCL include weed management provisions. CLE Officers have been in discussion with WMB and Parks and Wildlife on the new Government action on gamba grass within the 'Litchfield Loop'. Maps have been provided for gamba grass density on VCL within the Batchelor Township to support forward planning. VCL Weed Management Program - Katherine Region WMB provided CLE Officers with a list of 23 VCL sites that sit within 500m of the Class A (eradication Zone). 17 of the parcels have been added to the Katherine Weed Management Program (WMP) for treatment this season. The remaining 6 parcels were considered inaccessible. Due to the limited access, CLE Officers have engaged with the GEBC Project to be a site of the view of the vie
	have the sites included in NLC's aerial surveys of the Katherine River corridor.
	The Katherine Region WMP on VCL has been awarded and contractors commenced the first
	treatment in February 2025.
	• CLE notes that previous WMP procurement for VCL in the Katherine Region has been ad hoc, or for a 12-month period. The possibility of a 36 or 60 month plan for ongoing weed management is under consideration, pending funding.
	• The CLE Officer recently visited the Katherine Region and noted gamba grass near the
	Katherine CDU campus. This was reported to DLI Katherine. There were reports of 'large
	gamba grass infestations' within VCL in the Pine Creek area. CLE Officers reported two clusters of visual gamba grass on VCL in the township. This will be treated within the current
	WMP scope.
2a - 2f	Coomalie Community Government Council
	Presentation provided to the WAC to update on gamba grass management across Coomalie
	Community Council area.
4a and 4b	Territory Natural Resource Management (TNRM) – Land for Wildlife
	Collaborative Gamba Grass Roots & TNRM/Land for Wildlife half day workshop delivered to Land for Wildlife members and other landholders and community members, to support and encourage
	successful gamba grass management on private blocks.
2a, 2d and	TNRM – Gamba Army
2e	18 weeks of spraying have been delivered to date since the beginning of the wet season, with 1255 hours of Quikspray treatment applied (285 x 400L tanks of mix). Treatment has targeted VCL blocks in the greater Darwin area (33 sites, 1004 hours), Buffalo Creek and CDNP (2 parks, 44 hours), Litchfield Shire (3 sites, 72 hours over) Department of Corrections (1 site, 55 hours) and Department of Health (1 site, 65 hours).
4b	of Health (1 site, 65 hours). TNRM – Conference workshop
	Half day workshop hosted by TNRM in collaboration with WMB to showcase collective on-ground
	gamba grass management action in the context of the Weed Management Plan Gamba Grass 2020 -
	2030. The workshop was delivered to TNRM conference audience (rangers, community groups, land
	managers, Government staff, program deliverers/funders). Workshop content included learnings
10.00	from recent/current programs.
1a, 2c and 4b	TNRM support for NLC GBEC project Gamba grass ecology workshop delivered to Wardaman and Wagaman rangers, to increase
	understanding of gamba grass population ecology, seedbanks, establishment and spread risk.
1a 1b 1c,	Northern Land Council (NLC) – Gamba Eradication Biodiversity Conservation (GEBC) Project
3a, 4a and	Remote gamba grass engagement across West Arnhem, East Arnhem, Daly, Katherine and
4b	VRD.
	Healthy country planning with Jawoyn. Liaison with Mangarri and Mimal Traditional Owners
	 to garner support for GEBC project with key people. Organising Extravagamba Workshop scheduled for 26th March. This workshop is mobilising
	• Organising Extravagamba Workshop scheduled for 20 st March. This workshop is mobilising remote land managers to the Coomalie area to see and experience gamba grass in Coomalie
	Region to learn about gamba grass identification, survey, control and impacts.
	GEBC regional ranger workshops delivered in Katherine and Pine Creek. A Western Arnhem
	Region Workshop had to be cancelled due to sorry business in the region. Gamba grass survey
	and aerial control in the Eastern Daly Region.
	• Liaison with gamba grass permit holders and offer to control gamba grass on 2 permit leases
1	(under GEBC Project) if permits are surrendered. Negotiations still underway on operations.

2a, 2b, 2c,	NLC – GEBC Project
2d, and 2f	Commitment of project funds toward CSIRO biological agent research, contingent on other
	parties also supporting funding for research.
	 Aerial control of gamba grass on Port Keats Road underway.
4a and 4b	Community – Gamba Grass Roots Landcare Group – Empowering Landholders
	In collaboration with TNRM Land for Wildlife, private landholders and WMB a community forum was
	held at Livingstone Recreation Reserve on Saturday 22 nd February. The forum focused on
	empowering rural landholders to address gamba grass.
2a, 2c, 2d,	Community - Gamba Grass Roots Landcare Group - Education plus lobbying for support and
2e, 2f and	resources
4a	Open day/market stalls. Meetings with MLAs. A gamba grass petition with over 700 signatures tabled
	in the Legislative Assembly. A press release by Minister Boothby on 11 th February stated with regard
	to Litchfield National Park " will deliver targeted eradication and prevention efforts while maintaining
	an annual investment of \$250,000 for the Gamba Grass works" and "Ms Boothby acknowledged the work
	of dedicated park rangers and conservation groups, including the volunteers of Gamba Grass Roots "
2c and 2d	Community - Casuarina Coastal Reserve Landcare Group - Casuarina Coastal Reserve Adopt-a- Spot
	program conducted under the Parks and Wildlife Volunteers Program
	Continued gamba grass control in 13 "adopted spot" localities in Casuarina Coastal Reserve.
2c and 2d	Community – Weedwalkers Top End Landcare Group
	In collaboration with Parks and Wildlife the Weedwalkers Top End Landcare Group conducted gamba
	grass control at remote sites in Litchfield National Park.
2g	Community - Landcare NT - Darwin Harbour Catchment Waterways Project
	Proposal out for tender to map grassy weeds in four urban catchments.
WMB and G	FMU Updates:

Updates:
