

Did you know that you can **REDEEM** some cash on certain containers when you **RETURN** them?

You're already paying an extra 10 cents when you purchase drinks in eligible containers. These include glass bottles, cans, plastic soft drink and water bottles (up to 3 litres) plus fruit juice and flavoured milk cartons (less than one litre). Look for the 10c refund mark on containers to make a difference and claim your refund today.

Every container returned is then remade into a new one or something else new. This keeps it out of the environment and inside our economy.

So it's good for the environment and your back pocket.
It's a no brainer really.

**Make a difference.
RETURN IT, REDEEM IT.**
