

DECEMBER 2022

Boulter Road Stormwater infrastructure upgrades update

Dear Stakeholder,

The Department of Infrastructure, Planning and Logistics is upgrading stormwater infrastructure on Boulter Road in support of the Berrimah North Area Plan.

The upgrade involves the construction of an underground stormwater pipe to formalise drainage in the Boulter Road corridor.

The majority of underground pipe installation has been completed. Due to weather constraints the remainder of pipe installation will be undertaken in 2023.

Some minor construction works will continue throughout the wet season as required.

All road crossings, driveways and footpaths excavated will be reinstated and where possible, temporary fencing removed.

Access to properties and businesses will be maintained.

Motorists, residents and business owners are asked to like and follow RoadReportNT on Facebook to keep up to date as work progresses.
