

Holtze enabling infrastructure

Part B Package 1 clearing and sewer works

Dear stakeholder

Clearing works for Part B Package 1 of the Holtze enabling infrastructure project are scheduled to commence during the week of 18 May 2026. These works will include the installation of site fencing and site compound as well as clearing and other earthworks to prepare the area.

Construction of the new sewer line will commence in June 2026. This will include the sewer crossing Inverway Circuit. The works have been coordinated to occur whilst the road is closed for the Roystonea Avenue duplication project to minimise traffic disruptions. Pedestrian and cyclist access along Inverway Circuit will remain available for the duration of the works.

The sewer crossing Farrar Boulevard is planned to occur in July 2026 after Inverway Circuit has been opened. A separate stakeholder notice will be distributed closer to that time.

The location of Part B Package 1 works are shown on the map overleaf.

These works will take place from 7am – 5pm, Monday to Friday, and may cause some temporary construction noise and dust in the area consistent with normal construction works. Mitigation controls will be implemented to minimise the impact of noise and dust.

For further information, please contact the project hotline **1800 920 260**, email feedback@truenorthcomm.com.au, or visit environment.nt.gov.au/lands-planning/projects
