11 December 2020 8am	Palm Valley – Comp 4	During a regular inspection at compressor 4 in the plant, a pinhole leak was identified on the auto dump line to the scrubber. This line is not in constant use, it is only used when the level controller dump valve is open. This resulted in a minor release of gas which was so negligible it could not be calculated.	Minor	<u>Immediate</u> - Isolated the unit - Installed 'Rapp-it' bandage tape to successfully repair the pipework - Ordered replacement spool work be manufactured <u>Additional</u> - Once on site, the new spool work will be installed and tested	No uncontrolled releases of chemicals and hazardous materials	No environmental harm as the gas released was negligible dissipated quickly into the atmosphere.	n/a
