

Quarterly Summary Report about recordable incidents under Sec 35 Petroleum (Environment) Regulations

SUMMARY OF RECORDABLE INCIDENTS UNDER SEC 35 PETROLEUM (ENVIRONMENT) REGULATIONS							
QUARTERLY REPORTING FOR PERIOD 16/12/2020 TO 15/03/2020							
ENVIRONMENT MANAGEMENT PLAN – Velkerri 76 S2 civil construction EMP NT-2050-15-MP-031							
Incident date (dd/mm/yy)	Area / location	Incident summary	Actual consequence (from risk assessment) <sup>1</sup>	Corrective actions	Relevant Environment Performance Standard	Effect on Relevant Environmental Outcome	Other Regulator notification
18/12/2020	Beetaloo	During the Annual Environmental Performance Report (AEPR) generation, it was identified that the total water use for the Velkerri 76 civil program was 24ML, above the above the 20ML environmental management plan (EMP) environmental performance standard. The environmental performance measure was based upon an estimate of water use, with actual water use influenced by site specific factors. The total water use for the project was below the Water Extraction Licence (WEL) limit of 175ML/year, with this recordable incident considered administrative.	N/A- no consequence as water take was below the WEL limit.	Future environmental management plan performance standards to align with the WEL limit.	Groundwater take for civil program below 20ML	N/A- no impact on the environmental outcome	N/A- the water extraction level was below the WEL.
18/12/2020	Beetaloo	During the Annual Environmental Performance Report (AEPR) generation, it was identified that a non-compliance with the environmental management plan (EMP) environmental performance standard had occurred. Several Hyptis plants were identified on the Velkerri 76 S2 camp pad, which exceeded the environmental performance standard of “No introduction or spread of declared weeds resulting from Origin’s activities”. Based upon the location of the weed	Minor- Hyptis is a class B weed which was removed from site during the weed survey	The individual weeds were removed from site immediately. The recordable incident confirms that the controls to detect and respond to weed outbreaks are occurring as per the Weed Management Plan. A communication package is planned to be sent to all major contractors (including camps, civil construction	No introduction or spread of declared weeds resulting from Origins activities.	No impact on the environmental outcome is expected	N/A- weed was not a Weed of National Significance

		<p>introduction, the source of the weed is believed to be from a food truck which services Origin and surrounding pastoral properties. The general absence of weeds across Origins sites confirms weed controls are effective at mitigating weed introduction.</p>		<p>companies and drilling and completion service providers) prior to the mobilisation of the next field campaign.</p>
