

TERRESTRIAL VERTEBRATE BIODIVERSITY

STUDIES IN THE BEETALOO BASIN

Waterbirds

Studies of terrestrial vertebrate fauna in the Beetaloo Sub-basin aim to document the distribution of terrestrial species in the region and to identify sites of high ecological value. Pictured here is a selection of shore- and waterbird species detected in the study area between May and October 2021.

Australian Pelican
Pelicanus conspicillatus

Little Black Cormorant
Phalacrocorax sulcirostris

Australasian Darter
Anhinga novaehollandiae

Bush Stone-curlew
Burhinus grallarius

Black-winged Stilt
Himantopus himantopus

Australian Pratincole
Stiltia isabella

Red-capped Plover
Charadrius ruficollis

Black-fronted Dotterel
Elseyornis melanops

Masked Lapwing
Vanellus miles

Australian Painted-snipe
Rostratula australis

Red-necked Stint
Calidris ruficollis

Sharp-tailed Sandpiper
Calidris acuminata

Magpie Goose
Anseranas semipalmata

Plumed Whistling-Duck
Dendrocygna eytoni

Radjah Shelduck
Tadorna radjah

Pink-eared Duck
Malacorhynchus membranaceus

Pacific Black Duck
Anas superciliosa

White-faced Heron
Egretta novaehollandiae

Great Egret
Ardea alba

Intermediate Egret
Ardea intermedia

Royal Spoonbill
Platalea regia

Straw-necked Ibis
Threskiornis spinicollis

Glossy Ibis
Plegadis falcinellus

Brolga
Grus rubicunda

Black-necked Stork
Ephippiorhynchus asiaticus
