

# Make a difference. Return it. Redeem it.

Did you know that you can **REDEEM** some cash on certain containers when you **RETURN** them?

You're already paying an extra **10 cents** when you purchase drinks in eligible containers. These include glass bottles, cans, plastic soft drink and water bottles (up to 3 litres) plus fruit juice and flavoured milk cartons (less than one litre).

You get this **10 cents** back when you return the containers. Look for the 10 cents refund mark on containers to make a difference and claim your refund today.

Every container returned is then remade into a new one or something else new. This keeps it out of the environment and inside our economy.

So it's good for the environment and your back pocket.

It's a no brainer really.

For the year ending June 2022:

**1.5 billion +**

eligible containers were sold in the Territory (2011-2022)

**930 million +**

of those have been returned for recycling and reuse

**\$93 million**

in 10c refunds have been redeemed by consumers

**75%**

was the return rate in 2021-2022

**6000 tonnes**

of container materials were diverted from landfill

**600 million**

containers since 2012, have NOT been returned to collection depots

**That's \$3.5 million in refunds NOT redeemed**

**Make a difference.  
RETURN IT, REDEEM IT.**
